

Here are the information about the different log folders

On the CxManager:

C:\Program Files\Checkmarx\EngineScanLog

Note: this log folders contain the scan log and engine log for each scan in the web portal. User who download the scan log for each scan on the Web portal, the CxManager retrieve the log from this folder, when user delete a scan on the web portal, the related log folder will be delete.

On the CxEngine:

C:\Program Files\Checkmarx\Checkmarx Engine Server\Engine Server\Logs\ScanLogs

Note: All the log folder **can be delete**, the inside log file is copied to CxManager after the scan is completed

On the CxEngine:

C:\Program Files\Checkmarx\Checkmarx Engine Server\Engine Server\Scans

Note: all log folder **can be delete**, this log is generated during the scan and is not used after the scan is completed

Folder CxSRC

The **CxSRC** folder with source code, should be resided on CxManager machine, User select on the scan result, the source code on the panel will be from the CxManager machine **CxSRC** folder.

The **CxSRC** folder on the standalone CxEngine installation will be used during the scanning process, after that, it should be empty folder

Folder ExtSRC

All files are exclude by CxManager from Source pulling and can be delete

Folder CxReports

All files are generated as temporary and can be delete
